

# RUSHABH FULKARI

## SENIOR FLUTTER DEVELOPER

rushabhfulkari@gmail.com · +91-8105293356 · [rushabhfulkari.github.io](#) · [github.com/rushabhfulkari](#) · [linkedin.com/in/rushabh-fulkari](#)

### SUMMARY

**Senior Flutter Developer** with **5+ years** building and scaling production mobile applications in Flutter and Dart. I ship one multi-flavour codebase to **34 app flavours** and **60M+ users** across iOS and Android — owning monetisation, authentication and security, regulatory compliance, native platform integration, automated testing, and the CI/CD that makes releases routine rather than an event.

### TECHNICAL SKILLS

**CORE** Flutter · Dart · Flutter SDK · State Management: BLoC, Riverpod, Cubit · Clean Architecture · Dependency Injection (GetIt)

**PLATFORM** Android · iOS · Kotlin · Swift · Platform Channels · Native views · Push Notifications (FCM)

**DATA & API** REST APIs · Dio, Retrofit · JSON · Firebase · SQLite, Hive

**REAL-TIME** WebRTC · Stream · Agora · WebSockets · VoIP

**GROWTH & TRUST** AdMob · AppsFlyer · Akamai BMP · CMP, GDPR, ATT · i18n

**QUALITY** Unit, Widget & Integration Testing · Mockito, Mocktail · Maestro · Sentry

**DELIVERY** CI/CD · Bitrise · Fastlane · GitHub Actions · Google Play, App Store · Python, Java, C#, JS

### CUPIDMEDIA (Social Discovery Group) · May 2025 – Present

[AfroIntroductions](#)   [Muslima](#)   [ThaiCupid](#)   [FilipinoCupid](#)   — 34 dating apps, one Flutter codebase

#### Ad monetisation platform — built from zero

Banner, interstitial and native formats across **34 flavours**, with the native ad factories and platform views written on both iOS and Android, and **7 mediation networks** integrated.

Placements and ad-unit IDs made remote-configurable, so experiments ship **without a release**. Session-aware prefetch and throttling ended empty slots.

#### Regulatory compliance

Age verification on Google Play Age Signals and Apple's Declared Age Range API, behind a custom fail-open plugin — **Texas, Utah, Louisiana, Brazil**.

#### Security & authentication

Extended Akamai Bot Manager from **3 endpoints to the full account surface** with hardened 428 challenge handling; SDK to v4.3.0.

Migrated Google Sign-In to v7 with Credential Manager and retired Iovation — sign-in crash noise **down 40%**.

#### Stability & performance

Led the move to Sentry, then cut **Android ANR risk** by stripping the profiling, tracing and watchdog overhead surfaced in Play vitals.

### PROJECTS

#### Cadence [LIVE DEMO](#) [SOURCE](#)

Flutter reference app: **ten production-grade features in one codebase**, each with its trade-off written down beside the working code — offline-first sync, BLE GATT, server-driven UI, an LLM agent loop, certificate pinning, a WCAG AA audit, one screen embedded in Kotlin and Swift hosts over Pigeon.

#### Highlands Brain · Unico Connect

Audio-video calling on the Stream SDK — call lifecycle, custom ringtones, quality monitoring, 1:1 and group, reconnection through network drops, and call state persisted across the app lifecycle.

#### Sergo · Bottlecap

A form builder rendering text, checkbox, radio, dropdown, signature and file-upload fields **from API configuration alone** — multi-step validation, digital signatures, PDF generation.

#### Apprintly

Real-time order tracking over FCM, an interactive product designer with image manipulation, an admin dashboard for orders and delivery, payments, offline persistence on Hive.

### PROFESSIONAL EXPERIENCE

#### CupidMedia — Mobile Application Developer

May 2025 – Present

Architected multi-flavour Flutter infrastructure for **34+ global dating apps serving 60M+ users** on iOS and Android.

#### Unico Connect — Flutter Developer

Dec 2024 – May 2025

Built the audio-video calling module for Brain on the Stream SDK — call lifecycle, background handling and call-quality monitoring.

Persisted and recovered call state across the app lifecycle using BLoC.

#### Fastenal India — Flutter Developer

Jul 2023 – Dec 2024

Developed Flutter applications for manufacturing workflows in Dart and BLoC, integrated over REST APIs.

Built reusable form components with multi-step validation, error handling and offline behaviour.

#### Bottlecap Technologies — Flutter Developer

Oct 2021 – Apr 2023

Delivered social, dating and e-commerce Flutter apps with real-time features and REST API integration.

Implemented scalable state management and reusable UI components shared across products.

#### Freelance — Flutter Developer

Jan 2021 – Oct 2021

Shipped six Flutter applications across crypto, fashion, logistics and automotive. Handled the full cycle end to end: architecture, API integration, store release and post-launch fixes.
